

Full Stack Developer (MERN) and CSE (AI) undergraduate with strong proficiency in Java, DSA, and end to end web development. Delivered scalable, production-ready applications across the full SDLC — from architecture through deployment. Smart India Hackathon winner with hands-on experience in REST APIs, MongoDB, and vanilla JavaScript, eager to contribute across technologies in a cross-functional, collaborative environment.

SKILLS

Programming Languages	Java, JavaScript
Frontend Technologies	HTML, CSS, React, Tailwind CSS
Backend Technologies	Node.js, Express.js, Spring Boot
Databases	MySQL, MongoDB
Developer Tools	VS Code, Git, GitHub, Vercel, Render (Cloud Deployment)
Core Skills	DSA, OOP, REST APIs, DBMS, Problem Solving, Agile, Collaboration, Debugging, Analytical Thinking

EXPERIENCE

Peer Teacher — Data Structures & Algorithms Feb 2025 – Apr 2025

G.H. Rasoni College of Engineering and Management, Pune

- Conducted **8 sessions** on core DSA topics — arrays, linked lists, trees, stacks, and graphs — for a batch of **50+ students**.
- Mentored **50+ students** in writing efficient **Java solutions**, improving average problem-solving speed by focusing on time and space complexity optimization.
- Strengthened problem-solving skills of **50+ students** through **5+ coding patterns**, debugging strategies, and hands-on practice sessions — resulting in measurable improvement in DSA comprehension.

PROJECTS

WanderStay — Travel Destination & Listing Platform 2026

Personal Project

[GitHub](#)

- Built a full-stack travel listing platform using **Node.js, Express.js, MongoDB, and Mongoose** with complete CRUD operations across 7 RESTful endpoints.
- Designed modular **MVC architecture** with reusable EJS-Mate templates, Express middleware, and method-override for clean server-side routing.
- Debugged routing conflicts and database connection issues, applying systematic troubleshooting across the full development lifecycle.

BeatFlow — Music Streaming Platform Jan 2025

Personal Project

[View Project](#)

- Developed a music streaming web app with **real-time audio playback**, seekbar scrubbing, volume control, and playlist navigation using vanilla JavaScript.
- Wrote clean, modular JavaScript with separation of concerns across audio engine, DOM rendering, and event handling layers.
- Deployed on **Vercel** with fully responsive UI, mobile hamburger sidebar, and custom SVG playback controls.

PayMesh — Offline-First P2P Payment Relay over UPI 2026

Personal Project

[GitHub](#)

- Built a full-stack offline payment relay system using **Spring Boot, Spring Data JPA, and React**, simulating UPI-style transactions over a device-to-device gossip mesh network.
- Implemented **hybrid AES-256-GCM/RSA-2048 encryption** for payload confidentiality in transit, and an atomic idempotency layer with **TTL-based replay protection**, validated via a multithreaded concurrency test proving zero duplicate settlements.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (AI),

G.H. Rasoni College of Engineering and Management, Pune

Aug 2023 – June 2027

CGPA: 7.77

Class XII (HSC), Jawahar Navodaya Vidyalaya, Nandurbar

June 2022 – May 2023

Percentage: 73.00%

Class X (SSC), Jawahar Navodaya Vidyalaya, Nandurbar

June 2020 – May 2021

Percentage: 79.6%

ACHIEVEMENTS

Winner, Smart India Hackathon (Institution Level)

2025

DSA Practice — Regularly solving DSA problems on LeetCode
